(54) METHOD AND DEVICE FOR MANAGING NETWORK ADDRESS AND RECORDING MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To register a network address and a node name or the like, without limiting a machine or person, overlapping or illegally allocating the network address and overlapping the node name by adopting a Web browser for the operation of the registration or the like, presenting those which are capable of registration in the case of registration and automatically collating the input network address or node name with the registered one when making input.

SOLUTION: A network is composed of a client 1 to be linked through a network line to a network address managing device 2, while making the Web browser usable, network address managing device 2 and network address responding device 5. The client 1 is used for interactive operation when indicating registration of the network address or node name from a Web browser screen or retrieving registered contents. The network address managing device 2 is composed of a registration processing part 3, an address table file 4, a retrieval processing part 6 and a DB 7 for management.

## LEGAL STATUS

[Date of request for examination]  
 [Date of sending the examiner's decision of rejection]  
 [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]  
 [Date of final disposal for application]  
 [Patent number]

A not known 1-5

[Date of registration]

[Number of appeal against examiner's  
decision of rejection]

[Date of requesting appeal against  
examiner's decision of rejection]

[Date of extinction of right]
